

# **What Project Is**

By Using The Python Code, We Can Handle Data Easily

With Using Graphs, We Can Understand Data

With Using Given Csv File, You Can Run Python and You Can Understand Input Data

With That This File Will Help You to Understand This Project in Easy Way

## **What Is Aim of This Project**

In The Given Data There are Different Types of Disease That Can Be Identify in Male and Female With Different Age So With This Project We Can Try To Analysis The Given Data And We Can Find Easy Way To Manage This Data Which Will Help To Reduce This Disease In Male and Female

## **Solution From This Project**

As We Can See This Data Will Be Helpful for Medical Field So We Can Use This Method In Different Types Of Medical Data Similar With Given Data So We Can Reduce This Disease In Male and Female In Different Age

**This The Small Project Which I Have Done to Learn Something New and Creative Thanks.**
